

Discover forty of the most beloved birds of North American backyards, parks, and woodlands — each brought to life through detailed educational content and a full-page coloring illustration waiting to be filled with color.

WHAT'S INSIDE

- Each of the 40 bird modules includes:
- Two pages of natural history: habitat & range, diet, behavior, nesting, song, and conservation status
 - Quick Stats box: size, wingspan, weight, and lifespan data
 - A coloring guide identifying key plumage zones and suggested colors
 - Practical feeder tips for attracting the species to your garden
 - A full-page coloring illustration printed single-sided — so markers never bleed through

FOR WHOM

Designed for adult colorists, bird watchers, nature lovers, educators, and families with older children. Works beautifully with colored pencils, watercolor pencils, and fine-tip markers.

CONSERVATION

Each species profile includes IUCN Red List status and population trend data from the North American Breeding Bird Survey, with practical steps readers can take to support declining species.

FEATURING:
American Goldfinch • Northern Cardinal • Blue Jay • Ruby-throated Hummingbird
Eastern Bluebird • Baltimore Oriole • Cedar Waxwing • American Kestrel • and 32 more
